Workflow Exploration Report

Deposit a Check and Confirm Posting in Account Activity

Website: <https://www.ngpf.org/bank-sim>

Feature Area: Check Deposit Simulation

Goal: Simulate check deposit by entering amount, selecting account, uploading required images, and confirming deposit. Success: user receives confirmation message and a new deposit record is visible in Account Activity.

Generated: March 23, 2026 at 11:58 AM

Confidence: 95%

The AI successfully simulates a full check deposit workflow in the NGPF Bank Simulator. It navigates from the homepage to the check deposit feature, completes all necessary form fields and uploads, and verifies that the deposit appears in the account activity with a confirmation notification. This demonstrates end-to-end coverage of the check deposit process including ledger update.

Step-by-Step Walkthrough

1. Arrival at Bank Simulator Homepage

The AI navigates to the simulator's main homepage, ready to begin the check deposit journey.

<https://www.ngpf.org/bank-sim>

2. Simulator Dashboard & Welcome Modal

Upon starting, the AI is greeted with a welcome dialog on the main dashboard, confirming successful entry into the simulator.

<https://www.ngpf.org/bank-sim/home?returnUrl=%2F>

3. Accessing Deposit Checks Feature

The AI selects the 'Deposit Checks' option from the sidebar, loading the deposit check form.

The screenshot shows the 'Deposit Checks' page in the ngpf onlinebankSIM. The sidebar on the left contains links to HOME, NOTIFICATIONS, ACCOUNTS, TRANSFERS, BILLS, DEPOSIT CHECKS (highlighted), ONLINE SERVICES, MANAGE PROFILE, and SHOPPING. The main content area is titled 'Deposit Checks' and includes a sub-header: 'You may deposit checks below by taking a clear picture of the front and back of the check with a solid background. Be sure to endorse (sign) the back of your check first!'. Below this, there are two input fields: 'To *' and '\$ Amount *'. Underneath these fields is an 'Upload Check' section with two buttons: 'Front' and 'Back'. At the bottom of this section are 'Submit' and 'Cancel' buttons. The background of the page features a repeating pattern of stylized bank buildings.

4. Selecting Account for Deposit

The AI opens the account dropdown to choose the target account for the deposit, displaying available accounts and balances.

This screenshot shows the same 'Deposit Checks' page, but with the 'To *' dropdown menu open. The dropdown menu displays two options: 'CHECKING (Available Balance is \$216.04)' and 'SAVING (Available Balance is \$230.00)'. The rest of the page, including the sidebar and the 'Upload Check' section, remains the same as in the previous screenshot.

5. Checking Account Chosen

The AI selects the 'CHECKING' account, confirming the target for the check deposit.

Discovered Test Scenarios

#	Scenario	Type	Priority
1	Discovered Workflow: e2e_business_workflow - Complete User Journey	e2e_business_workflow	high

Discovered Workflow: e2e_business_workflow - Complete User Journey

Comprehensive test covering the full simulated check deposit journey with confirmation and ledger update.

A user navigates to NGPF Bank Sim, starts the app, interacts with onboarding modals, accesses the deposit checks area, selects the 'CHECKING' account, inputs a specific amount, uploads simulated check images, and confirms both in-app success feedback and a new transaction record in the account activity page.

- Use `waitForSelector` for any dynamic modals/dialogs before clicking.
- Respect Shadow DOM: where `web_component_parent` is present, use `pressSequentially` or equivalent for complex input fields.
- Always use `all_selectors` array for robust targeting and fallback.
- After submission, explicitly wait for confirmation message and for account activity table to update.
